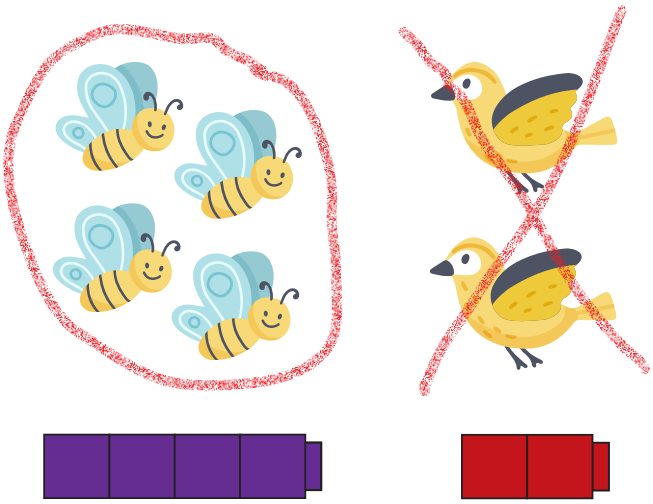
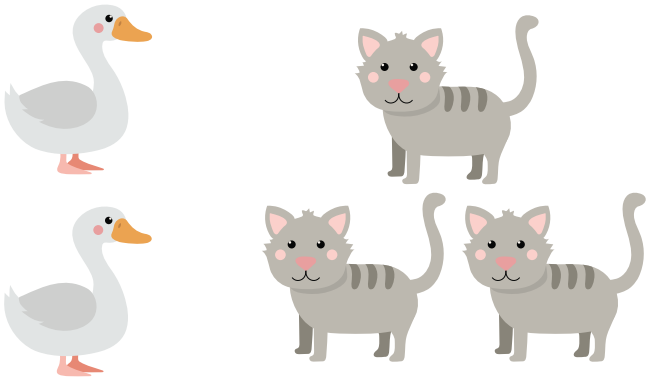
Compare Groups

Directions: Read each word problem aloud. Ask children to use UniLink® Cubes to represent the groups of objects. Have children put a circle around the group with more objects and an X on the group with less objects.

1. Emily sees 4 butterflies.
Sarah sees 2 birds.
Who saw more? Who saw less?

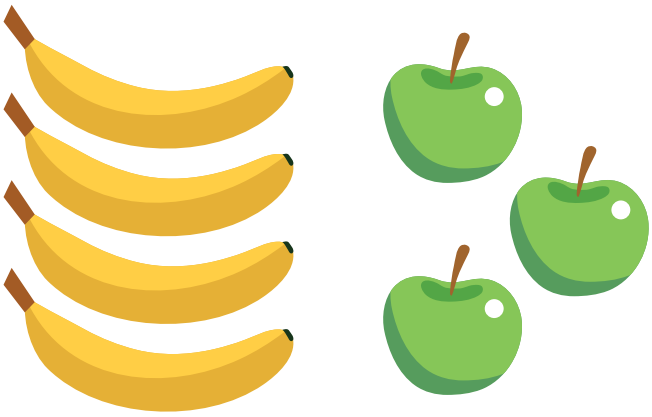


2. Damien sees 2 ducks.
Chase sees 3 cats.
Who saw more? Who saw less?



3. Ava has 5 pencils.
Jacob has 2 crayons.
Who has more? Who has less?

4. Mia has 4 bananas.
Jordan has 3 apples.
Who has more? Who has less?



Look Out!

If children are having trouble comparing two groups of objects, it can be helpful to use only 2 colors of UniLink Cubes, such as green and blue. Have children line up the correct number of green cubes in front of the blue cubes to illustrate 1-to-1 correspondence.

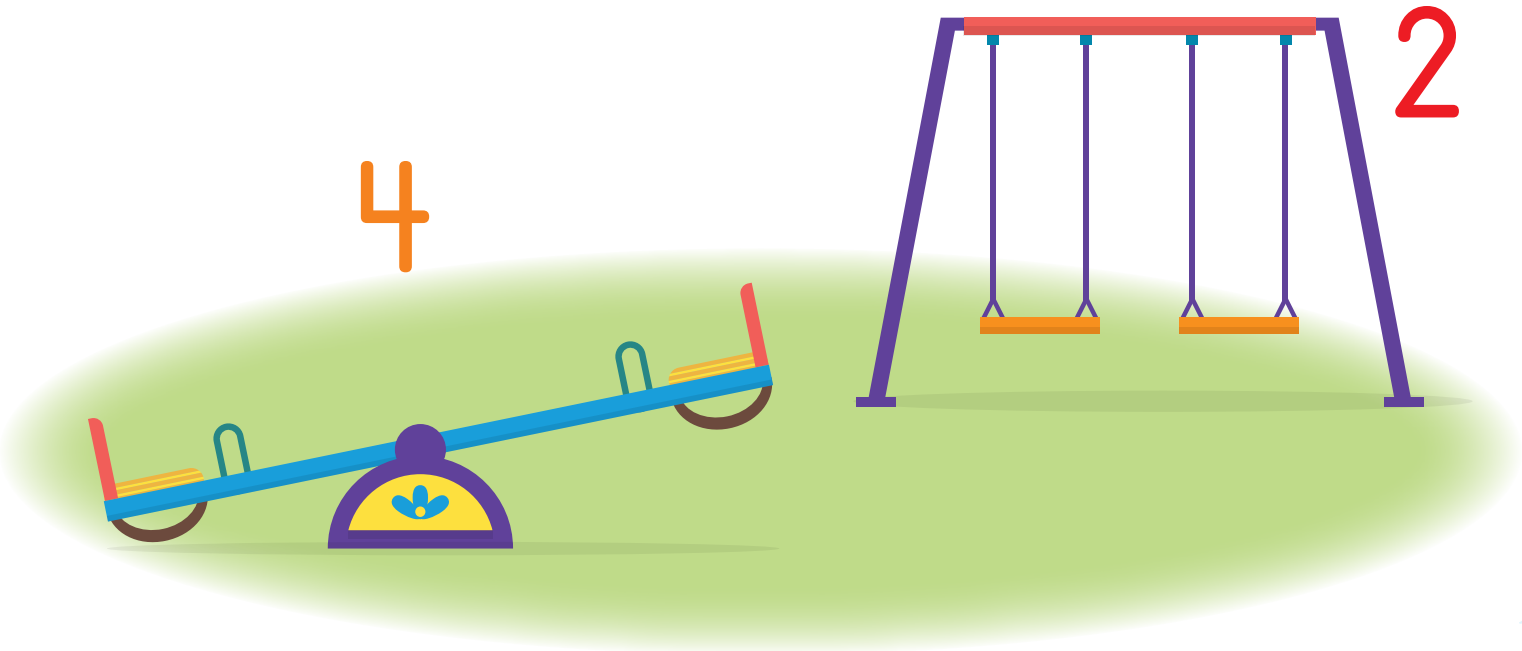
Compare Groups

Directions: Each problem below shows 2 pieces of playground equipment with a number. Ask children to place the correct number of Classifying Counters on each piece of equipment. Talk together about which piece of equipment has more counters. Which has less counters?



More Ideas

Pretend play is a huge brain builder for PreK children. It helps develop narrative skills, vocabulary, and social-emotional intelligence. After completing the problems, encourage children to play freely with their Classifying Counters on the workbook page.
