Explore Pictographs

Directions: Read the sentences below aloud and discuss what children observe in the pictograph. Use UniLink® Cubes to represent each object in the graph. Then, write or trace the answers to the questions below.

Grayson's class is talking about their favorite ocean animals. The choices are a crab, a shark, or a sea turtle. Grayson's teacher made this graph to show everyone's animal choices.

	Crab	**Shark**	**Sea Turtle**

1. How many children picked crabs? _____

2. How many children picked sharks? _____

3. How many children picked sea turtles? _____

4. What animal would you pick? Draw your choice on the graph. Now how many children chose that animal? _____

Look Out!

Watch for children who try reading the graph from left to right instead of up and down. Touch and count the like pictures to demonstrate how the data can be read on this graph.

1				

1. What type of counter do we have the most of?

2. What type of counter do we have the fewest of?

More Ideas

Demonstrate how pictographs can be useful in everyday life. For example, draw a simple grid on paper with several meal options as choices. Have family members choose which meal they would prefer, and use the graph to represent and interpret the data.
