Compare Informational Text

Directions: Read the passages on this page and the next page aloud. Make observations and comparisons about the stories and images together. Then, place a colored chip on each answer bubble. Children must answer questions by picking up the correct chip with their Magnetic Wand.

Elephant Babies

A baby elephant is called a **calf**. When a calf is born, it weighs 200 pounds.

Elephant calves drink milk, just like human babies do. Elephant moms teach their babies to how to use their trunks and how to stay safe.

Baby elephants need to stay with their mom for many years. Mom elephants watch over calves while they learn and explore.

1. What is the first story about?

baby elephants | baby lions | baby flamingos

2. What is the second story about?

baby elephants | baby lions | baby flamingos

Look Out!

If children struggle to compare the two stories, you can create a visual reminder to reinforce that the two stories are different from each other. Using two pieces of paper, write "Elephant Babies" on one and "Flamingo Babies" on the other. Tell children that the two pieces of paper represent two different books, and place them on the table. As you read the questions, point to the appropriate piece of paper.

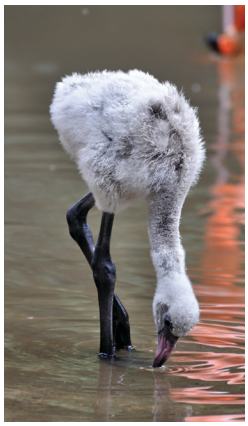
Flamingo Babies

A baby flamingo is called a **chick**. Chicks hatch from eggs. Flamingo moms keep their eggs warm for 30 days before the chick hatches out.

Flamingo chicks are not pink. They have soft, white feathers that help keep them warm. It takes 3 years for them to change color.

Flamingo chicks like to play and learn together. Flamingo moms and dads can find their babies by listening for their voice.



3. Which animal hatches from an egg?

- ○ baby elephants
- ○ baby flamingos

4. Which baby drinks milk?

- ○ baby elephants
- ○ baby flamingos

5. What is a baby elephant called?

- ○ a chick
- ○ a calf

6. When do baby flamingos leave their nest?

- ○ after 5 days
- ○ after many years

More Ideas

Compare and contrast familiar books from your child's bookshelf or the local library. Even if they aren't related topics, ask children to look for similarities they notice. For example, do both books have animals? Are they both fairy tales? Do they both take place in winter?
